

# CDC Coalition

March 1, 2021

The Honorable Rosa DeLauro  
Chair  
House Appropriations Subcommittee  
on Labor, Health and Human Services,  
Education, and Related Agencies  
Washington, DC 20515

The Honorable Tom Cole  
Ranking Member  
House Appropriations Subcommittee  
on Labor, Health and Human Services,  
Education, and Related Agencies  
Washington, DC 20515

The Honorable Patty Murray  
Chair  
Senate Appropriations Subcommittee  
on Labor, Health and Human Services,  
Education, and Related Agencies  
Washington, DC 20510

The Honorable Roy Blunt  
Ranking Member  
Senate Appropriations Subcommittee  
on Labor, Health and Human Services,  
Education, and Related Agencies  
Washington, DC 20510

Dear Chairwomen DeLauro and Murray and Ranking Members Cole and Blunt:

The undersigned 193 members of the CDC Coalition and other supporting state and national organizations urge you to provide at least **\$10 billion for the Centers for Disease Control and Prevention's programs in the FY 2022 Labor, Health and Human Services, Education and Related Agencies Appropriations bill**. We believe that Congress should prioritize funding for all of the activities and programs supported by CDC which are essential to protect the health of the American people. We are grateful for the important increases Congress provided for CDC programs in FY 2021 and for the emergency supplemental funding provided through CDC as we continue to battle the COVID-19 pandemic. At the same time, many CDC programs have not received the significant funding increases that are needed to address the many other health challenges we face as a nation.

The CDC Coalition is a nonpartisan coalition of organizations committed to strengthening our nation's public health infrastructure and prevention programs. Our mission is to ensure that health promotion and disease prevention are given top priority in federal funding, to support a funding level for CDC that enables it to carry out its prevention mission and to ensure an adequate translation of new research into effective state and local programs. Coalition member groups represent millions of public health workers, researchers, clinicians, educators and citizens served by CDC programs.

CDC serves as the command center for the nation's public health defense system against emerging and reemerging infectious diseases as well as man-made and natural disasters. . From playing a leading role in aiding in the surveillance, detection and mitigation of the COVID-19 pandemic in the U.S. and globally, to playing a lead role in the control of Ebola in West Africa and the Democratic Republic of the Congo to monitoring, investigating and helping to control the recent measles outbreaks in the U.S., to pandemic flu preparedness, CDC is the nation's – and the world's – expert resource and response center, coordinating communications and action and serving as the laboratory reference center. States, communities and international partners

rely on CDC accurate information, direction and resources to ensure they continue to be prepared for and able to respond to and recover from a crisis or outbreak. States, communities and international partners rely on CDC for accurate information, direction and resources to ensure they continue to be prepared for and able to respond to and recover from a crisis or outbreak.

In addition to playing a leading role in protecting the public's health from COVID-19, CDC is faced with many other unprecedented challenges and responsibilities ranging from chronic disease prevention to combating the opioid, tobacco, e-cigarette use and obesity epidemics to emergency preparedness. CDC funds programs for injury control; research into gun violence prevention; global health security; health promotion in schools and workplaces; the prevention of diabetes, heart disease, stroke, cancer, lung disease and other chronic diseases; tobacco prevention and control; nutrition and physical activity; immunizations; HIV, STI and hepatitis prevention; prevention of vector-borne diseases; environmental health, including the prevention of childhood lead poisoning and protecting the public from the health impacts of climate change; oral health; reducing health disparities; preventing infant mortality and birth defects; sickle cell disease data collection; preventing antimicrobial resistance; preventing prescription drug overdose; improving the health and quality of life of individuals with disabilities; Alzheimer's disease prevention and awareness; vision and eye health and public health research and health statistics. It is notable that more than 70% of CDC's budget supports public health and prevention activities through state and local health organizations and agencies, national public health partners and academic institutions.

In addition to ensuring a strong public health infrastructure and protecting Americans from public health threats and emergencies, CDC programs are crucial to reducing health care costs and improving health. Despite the progress CDC has made to meet these needs, the agency's programs have been woefully underfunded. **We urge you to support a funding level of at least \$10 billion for CDC's programs in FY 2022.**
