

Manager/Senior Manager Digital Marketing – Lead Generation

CURE Epilepsy is seeking a highly engaged and dedicated Manager/Senior Manager Digital Marketing who is looking for an exciting opportunity where s/he can make a difference in the lives of others.

Overview of CURE Epilepsy:

One in 26 Americans will develop epilepsy in their lifetime. For many of them, that means uncontrollable seizures, stigma and discrimination in their communities, and sharply increased risks of health complications and death. They need much more than efforts to manage their seizures – they need a cure.

For more than 20 years, CURE Epilepsy has been on an unrelenting search for that cure. Founded in 1998 by Susan Axelrod and a small group of fellow parents, CURE Epilepsy was born out of their shared frustration over the current state of epilepsy treatment. While the focus at that time centered on treating seizures and symptoms, that approach offered little relief for the 30% of epilepsy patients who don't respond to treatment. Axelrod and her fellow founders knew it was time to change the conversation from treating to curing epilepsy – and they dared to believe a cure was possible.

As the nonprofit leader in epilepsy research and the only organization solely dedicated to finding a cure for epilepsy, we've worked to shift the focus from merely managing symptoms to understanding the causes of this complex condition. With 3.4 million Americans and 65 million people worldwide living with epilepsy, CURE Epilepsy is committed to furthering patient-focused research that can ultimately deliver the answers they need.

Position Summary:

The Manager/Senior Manager Digital Marketing – Lead Generation is responsible for driving online lead generation and rapidly growing CURE Epilepsy's email list and social media audience of prospective donors. This position is integral in developing compelling programming and advertising strategies to build awareness, grow and engage our audience and convert them to donors. Primary goals include building awareness of epilepsy and CURE Epilepsy's mission across all key channels, increasing the number of marketable leads, and inspiring our new and existing audiences to take both online and offline action in helping CURE Epilepsy achieve its mission.

Key Responsibilities:

- Enhance and manage SEO and SEM to support advertising, social, and website, including recommending and updating website sections to support organizational priorities, as appropriate. Work across organization to ensure all social and web content is keyword optimized to elevate visibility and searchability across platforms.
- Develop and implement effective advertising strategies to drive lead generation efforts, including creating ads and/or retargeting ads, executing campaigns, evaluating results, optimizing Google Ads & Google Grant, and implementing A/B ad testing. Collaborate within the MarCom team and across Development and Research to optimize timing and placement.
- Collect, monitor, and analyze results for all lead generation activities, awareness building campaigns, donor engagement and conversion efforts, and any other efforts that may be needed. Provide monthly updates, or more often, as appropriate. Develop and present findings, make recommendations to improve approach, and implement necessary improvements. Share results within and across internal teams.
- Manage website developer relationship, including identifying website enhancements and improvements, ensuring they are managed on time and on budget.
- Develop and understand segmentation for new and existing leads. Identify and plan approaches to engage segments and leads, optimize engagement, customer retention, and donor conversion across the web and digital channels, including web content, landing pages, online forms, etc. Work in coordination with Digital Marketing – Content Manager when appropriate.
- Ensure all content, ads, etc. are created in a brand compliant fashion.

- Stay up-to-date on new digital media technologies, their capabilities, best practices, and how other organizations are using them, in an effort to become early adopters of these technologies.
- Provide day-to-day budget management and oversight for key projects.
- Project management.
- Additional job responsibilities as required.
